

While it is helpful to recommit your django project wrapper back to a distributed version control repository. \*  
It is also important to remember that production instances will store security information in the  
local\_settings.py \* Admin/Devs should always remember to exclude this file in the .gitignore file in the same  
folder as the .git:

??? (????????:        ?????????        ?) ??????????????, ?????????????        ????????????, ?????????????????????  
????????????????, ?????????????????, ? ...

??? (????????:        ?????????        ?) ??????????????, ?????????????        ????????????, ?????????????????????  
????????????????, ?????????????????, ?????????????????????
