Alaska Energy Metals Corporation has closed its previously announced acquisition to acquire 100% of the issued and outstanding securities of 1413336 B.C. Ltd., the owner of the Angliers-Belleterre nickel-copper project in western Quebec.

On the back of industry and fiscal reform, Equatorial Guinea is officially open for business and investment, said the country's Minister of Mines and Hydrocarbons, Antonio Oburu Ondo.

Alaska Energy Metals announces a new offering of \$0.17 Special Warrants and Units for up to CAD\$5,000,000 in proceeds. Proceeds to be used primarily for continued drilling at the Canwell prospects and for step-out drilling at the Eureka nickel deposit at the Nikolai project in Alaska.

It's main projected, located in development-friendly central Alaska near existing transportation and power infrastructure, the project is well-situated to become a significant, domestic source of critical and strategic energy-related metals.

Through licensing rounds and direct negotiations, we are continuing to position the country as an attractive energy investment destination with global majors such as Kosmos Energy, ExxonMobil and Chevron as well ...

Through licensing rounds and direct negotiations, we are continuing to position the country as an attractive energy investment destination with global majors such as Kosmos Energy, ExxonMobil and Chevron as well as independents such as Marathon Oil, Atlantic Methanol, Trident Energy, Gunvor and Vaalco Energy and more, operating in the country.
