

Analysis of photovoltaic support acceptance results

What factors affect residents' intention to adopt solar photovoltaic technology?

The meta-analysis results suggest that "Attitude" is the most critical factor affecting residents' intention to adopt solar photovoltaic technology. This finding is in line with the Theory of Planned Behavior and is consistent with the results of most studies.

Are residential photovoltaic systems a determinant of solar adoption?

Abstract The adoption of residential photovoltaic systems (PV) is seen as an important part of the sustainable energy transition. To facilitate this process, it is crucial to identify the determinants of solar adoption.

Can solar PV development accelerate public acceptance?

Although solar PV development takes time and effort, effective policies and collaboration among stakeholders could accelerate public acceptance, thus achieving the nation's renewable-energy goal. None declared.

What is the mediating effect of Pu on solar PV adoption?

H3a and H3b were supported based on the mediating effect of PU on solar PV adoption: H3a: The PU mediates the relationship between environmentalism and the intention to adopt solar PV. H3b: The PU mediates the relationship between knowledge and the intention to adopt solar PV.

How can policymakers improve user adoption of solar PV?

Policymakers could use the information to develop more effective policies to increase user adoption of solar PV, as well as future researchers to identify the external factors that influence the use of solar PV in developing countries.

How do early adopters influence the adoption rate of solar photovoltaics?

Similarly, DOI provides insights into how innovations such as solar photovoltaics spread within a community. This theory underscores the significance of early adopters and the characteristics of innovations, including relative advantage, compatibility, complexity, trialability, and observability, in shaping the adoption rates.

Documentation of the energy yield of a large photovoltaic (PV) system over a substantial period can be useful to measure a performance guarantee, as an assessment of the health of the ...

A meta-analysis of residential PV adoption: the important role of perceived benefits, intentions and antecedents in solar energy acceptance ... In the discussion, results are put in perspective ...

The results of acceptance ratio (AR), yield (Y), specific yield (SY), and performance ratio (PR) show that almost half of the AR's data results show below 0.9 with the performance ratio of PV ...

Determinants of residential photovoltaic adoption intention - A meta-analysis Emily Schulte^{1*}, Fabian Scheller^{1,2}, Daniel Sloot³ and Thomas Bruckner¹ 1: Chair of Energy Management ...

A meta-analysis of residential PV adoption: the important role of perceived benefits, intentions and antecedents in solar energy acceptance Emily Schulte^{a,*}, Fabian Scheller^{a,b}, Daniel Sloot^c ...

The results show that: (1) according to the general requirements of 4 rows and 5 columns fixed photovoltaic support, the typical permanent load of the PV support is 4679.4 N, ...

and 5 columns fixed photovoltaic support, the typical permanent load of the PV support is 4679.4 N, the wind load being 1.05 kN/m², the snow load being 0.89 kN/m² and the seismic load is ...

(DOI: 10.1016/j.erss.2021.102339) The adoption of residential photovoltaic systems (PV) is seen as an important part of the sustainable energy transition. To facilitate this process, it is crucial ...

results of the MASEM analysis support the findings of [5,18] that socio-demographic variables are no good predictors of adoption decisions. The most important predictor for adoption intention ...

While many recent research projects have emphasized wind energy (Jobert et al 2007; Devine-Wright and Howes 2010), solar energy sites have received less attention in the analysis of ...

Abstract: In response to the safety and economic impact of large-scale distributed photovoltaic grid connections on the distribution network, this paper proposes a distributed photovoltaic grid ...

PDF | The suspension cable structure with a small rise-span ratio (less than 1/30) is adopted in the flexible photovoltaic support, and it has strong... | Find, read and cite all ...
