

How does solar heating work with Oku absorbers?

Solar heating for swimming pools with OKU-Absorbers normally will be operated with a direct circuit. The water from the pool will be pumped directly through the absorbers. The use of a heat exchanger is not necessary. This configuration can usually be selected if the absorbers are not to be set up higher than 6 m above the surface of the water.

What is Oku's solar heating?

OKU's solar-panels are especially designed for this application. This is what OKU's solar heating provides: maximum efficiency and the right temperature for your swimming-pool. Enjoy a warm and comfortable pool temperature with OKU's solar heating.

Why should you choose Oku's solar panels?

OKU's solar-panels, made of high density polyethylene, offer the right foundation for operating such installations. low pressure loss, high efficiency, non-corroding resistant to swimming pool water absolutely frost-proof, produced in one piece resistant to animal bite marks supports human weight simple to install - modular system

How to install Oku absorbers?

Place the OKU-Absorbers on the designated areas in the arrangement that is desired and connect them with hose connections and hose saddles according with the the scheme of connection. In case of steeper sloping roofs, roof fastenings must be carried out simultaneously to prevent absorbers from slipping away during installation.

How do Oku absorbers work?

The water of the swimming pool can flow through the OKU absorbers in either direction, so they can be mounted both lengthwise and side by side. The individual rows of absorbers are connected on a Tichelmann principle (same routes for each row). It is not advisable to connect more than ten absorbers in series.

Can a variable speed pool pump be used with Oku panels?

Variable speed or PV solar powered pool pumps are not to be used with OKU panels. Why? Such pumps have large start up currents and will expose panels to high fatigue working pressure fluctuations. The quick reference tables below outline Australian Standard pump sizing recommendations. There is a range of pump powers one can choose from.

This is what OKU's solar heating provides: maximum efficiency and the right temperature for your swimming-pool. Enjoy a warm and comfortable pool temperature with OKU's solar heating. It is a rewarding investment that is powered by the sun's free energy and it is your contribution to protecting the environment. OKU's - solar heating of ...
