

Anguilla sun power company

The solar PV plant is CDB's sixth intervention in the energy sector in Anguilla, and supports the Government of Anguilla's goal of transforming the country into a low carbon economy. The country has set a national target of producing 30 percent of its electricity from renewable sources by 2030 and cutting greenhouse gas emissions.

Each panel produces Direct Current (DC) power by absorbing sunlight that is later converted into Alternating Current (AC) electricity to be used in households all over Anguilla. This project is a landmark development for Anguilla's future, and positions the island as one of the leaders in renewable energy throughout the region.

This expensive, wildly fluctuating priced power is also extremely unclean with significant carbon emissions. Add to that, the fact that the region receives roughly 35% more sunlight per annum, and it you have the perfect formula for the adoption of solar power.

Our residential solar solution not only serves as a backup during load shedding but also maximizes the return on your PV investment. With seamless switching and a noiseless design, our solution offers the ideal power solution for your home.

Anguilla sun power company

The Anguilla Electricity Company (ANGLEC), one of the island's most financially successful statutory bodies, has broken ground for a 3.3 million US dollar one megawatt solar farm to produce about 10% of Anguilla's total energy needs.

During a press briefing on Tuesday, September 13, 2022, Mr Sutcliffe Hodge, CEO of the Anguilla Electricity Company, Ltd. (ANGLEC), shared plans with the media for the company's roll out of a phased approach to the delivery of renewable energy.
