

Anti-dumping of new energy photovoltaic brackets

Does the EU impose a dumping duty on solar panels?

the imposition of measures is not against the Union interest. On the basis of these findings, it has been decided to impose an anti-dumping duty in a two-staged process: for two months, a duty of 11.8% will have to be paid, whereas from 6 August, duties ranging from 37.3% to 67.9% (averaging 47.6%) will be levied on solar panels from China.

Will European Commission impose anti-dumping duties on Chinese solar panels?

The European Commission today decided to impose provisional anti-dumping duties on imports of solar panels and key components (i.e. cells and wafers) from China. An investigation found that a Chinese solar panel is sold to Europe far below its normal market value.

How long are anti-dumping duties imposed on solar panels?

Provisional anti-dumping duties are imposed for a six months period. The 11.8% duty enters into force on 6 June at midnight and one minute local time, i.e. the anti-dumping duty is applied on solar panel imports one hour later in Dover than for example at the port of Rotterdam.

Are Chinese solar panels being dumped in the EU?

The investigation was initiated on 6 September 2012 following a complaint lodged by EU ProSun, an industry association, which claims solar panels from China are being dumped in the EU at prices below market value and causing material injury to the EU photovoltaic industry (MEMO/12/647).

Does the EU 'double-anti' policy affect China's PV industry?

The results of the research showed that China has not yet formed a complete value chain of the PV industry that is internationally competitive. The economic effect of the "double-anti" policy on China as a result of the EU is more pronounced than that with the U.S.

Are Chinese solar modules flooding the EU market?

Industry data suggests that solar modules from China sold for 50 % of their production cost are flooding the EU market. While this influx can help the deployment of solar power in Europe in the short term, imports at dumped costs open the door to products benefiting from unfair market and labour conditions.

China Energy Wins Three PV Plants at COP29 - ... This anti-dumping investigation on imported fluorine-containing backsheets originating in or exported from China was launched by the Department of commerce new ...

The Turkish authorities applied an anti-dumping tariff of \$25/m² solar modules imported from Vietnam, Malaysia, Thailand, Croatia, and Jordan. ... He has been reporting on solar and renewable ...

Anti-dumping of new energy photovoltaic brackets

In 2024, the Turkish authorities implemented anti-dumping measures on solar module and panel imports from Vietnam, Malaysia, Thailand, Croatia and Jordan . Want to know more about this ...

The paper analyzes the interactions between trade and renewable energy policies based on the EU-China solar panel dispute which is the most significant antidumping (AD) complaint in ...

Finally, trends in production capacity and financial conditions imposed by anti-dumping duties on Taiwan's PV industry are simulated to address the impact that different anti-dumping duty rates ...

the current anti-dumping framework of the European Union. Chapter 2 of the paper introduces the issue by presenting a factual narrative of the specific antidumping dispute about solar panels

The recommended anti-dumping duty is \$590 per metric ton for products from Changzhou Sveck Photovoltaic New Material Company and \$897 per metric ton for other producers. In 2019, India had imposed anti-dumping ...

In September 2023, the Turkish authorities decided to maintain anti-dumping measures on of solar photovoltaic module and panel imports originating from China, initially implemented in ...

amending Regulation (EU) No 513/2013 imposing a provisional anti-dumping duty on imports of crystalline silicon photovoltaic modules and key components (i.e. cells and wafers) originating ...

Provisional anti-dumping duties are imposed for a six months period. The 11.8% duty enters into force on 6 June at midnight and one minute local time, i.e. the anti-dumping duty is applied on ...

have launched anti-dumping investigations on China's photovoltaic products, and the develop-ment of China's photovoltaic industry has suffered a major blow. Based on the data analysis of ...
