

Aps energy storage system explosion

What happened at APS battery storage?

A new report, commissioned by APS, reveals what led up to the explosion at one of their battery storage facilities on April 19, 2019. SURPRISE, AZ -- A new report, commissioned by APS, reveals what led up to the explosion at one of their battery storage facilities on April 19, 2019.

What happened at APS McMicken battery energy storage?

The report presented an analysis conducted by DNV GL on behalf of Arizona Public Service (APS) regarding the investigation into a thermal event and subsequent explosion that occurred at the APS McMicken Battery Energy Storage facility.

Does APS have a battery storage facility in Arizona?

APS said they have two other large battery storage facilities in Arizona, but since the explosion, they have taken both out of service until the report's recommendations can be implemented. Meanwhile, Surprise Fire is still conducting its investigation into the explosion. You can read the full report [here](#).

What happened at an APS storage facility in surprise?

Last Friday evening in Surprise, Arizona, a storage facility owned by Arizona Public Service (APS) exploded, injuring four firefighters.

Did ESS deflagrate a lithium-ion battery energy storage system?

This report details a deflagration incident at a 2.16 MWh lithium-ion battery energy storage system (ESS) facility in Surprise, Ariz.

What is the AES Advancion battery storage system in surprise?

The storage system in Surprise was installed in late 2016 as part of an agreement between APS and AES Energy Storage for two 2-MW AES Advancion battery arrays in Surprise and Buckeye. They were AES' first installation in Arizona and APS was among the first to own an Advancion battery storage array.

The APS report said that clean agent systems may still be appropriate for use in energy storage facilities to manage incipient fires, "but they must be used in conjunction with ...

At 4:54:30 PM, on April 19, 2019, remote monitoring systems received notifications of an anomaly at a lithium ion battery facility in Surprise, Arizona.. Module 2 of Rack 15, in a 2 MW/2.16 MWh ...

presented by UL provides an overview of energy storage safety regarding the scope of the testing of energy storage products and systems. Please refer to the respective links below for the full ...

UL undertook an exhaustive fact-gathering effort, ultimately published in the report "Four Firefighters Injured

Aps energy storage system explosion

In Lithium-Ion Battery Energy Storage System Explosion - Arizona." Arizona Public Service (APS) commissioned its own 70 ...

This report details a deflagration incident at a 2.16 MWh lithium-ion battery energy storage system (ESS) facility in Surprise, Ariz. It provides a detailed technical account of the explosion and fire ...

Friday night, April 19, an explosion at a grid-scale energy storage unit near Phoenix injured four firefighters who were investigating a report of smoke rising from the facility. The APS McMicken ...

An internal cell failure in a single battery started a cascading thermal runaway event that resulted in the April 19, 2019, explosion at Arizona Public Service's (APS) McMicken ...

A photo in an APS report shows exterior damage shortly after an explosion at a solar energy storage system facility in Surprise. The explosion injured four Peoria firefighters. Photos courtesy APS. Facebook; Twitter; ...

In short, the two reports find five root causes of the explosion: Internal failure in a battery cell initiated thermal runaway. The fire suppression system was incapable of stopping thermal runaway. Lack of thermal barriers ...

2.16 MWh lithium-ion battery energy storage system (ESS) that led to a deflagration event. The smoke detector in the ESS signaled an alarm condition at approximately 16:55 hours and ...

Further to that investigation, a team from DNV GL was asked by APS to perform technical analysis of the event at McMicken Battery Energy Storage System in West Valley, Arizona, characterised as thermal runaway ...
