Why does my roof leak after installing solar panels?

There are various reasons your roof could leak after installing solar panels. They mostly have to do with poor installation where mounting holes are not sealed properly, the top is incompatible with solar panels, or the roof is old and not designed for solar panels.

Are solar panels causing a surge in photovoltaic panel waste?

The coming surge in photovoltaic panel waste is tiny compared to other categories, and most health concerns about solar equipment are unfounded. The Amazon Fort Powhatan Solar Farm in Disputanta, Virginia on August 19, 2022. Credit: Drew Angerer/Getty Images

Are solar panels a problem?

The vast quantity of waste from all of those sources is a concern and we need to find ways to reduce waste, but solar panels are not a major issue in that larger conversation. Solar panels do not contain harmful levels of the toxic materials that often get discussed at public hearings about development.

What's wrong with solar panel waste?

A Path Forward on Solar Panel Waste Perhaps the biggest problem with solar panel waste is that there is so much of it, and that's not going to change any time soon, for a basic physical reason: sunlight is dilute and diffuse and thus require large collectors to capture and convert the sun's rays into electricity.

Do solar panels produce less power?

Less-than-perfect weather conditions are a fact of solar pv life and there's nothing you can do about it. Solar panels also degrade gradually over time. So, after a decade of ownership, your panels might produce slightly less power than they did when new.

Are photovoltaic panels a good idea?

Photovoltaic panels are a boon for clean energy but are tricky to recycle. As the oldest ones expire, get ready for a solar e-waste glut.
