

# Are solar panels really reliable

Are solar panels a good investment?

Buying solar panels is a long-term investment that should help cut your electricity bills and carbon footprint. But will they pay for themselves and earn you money? Solar panels are often marketed as a way to save money on electricity - and sometimes as a way to make money too.

Are solar panels worth it?

If you're ready to save some cash, while you help save the planet, take a look at the solar panel stats and weigh up the pros and cons of solar panels for yourself to see if they will be worthwhile. Solar panels are very energy-efficient and reduce reliance on the National Grid.

Should you get solar panels?

There's no easy, one-size-fits-all answer to whether you should get solar panels, but there are some certainties. Provided you've got an appropriate roof for it, a solar installation will save you money on your electricity bills. And on sunny days, a well-sized installation will earn you a small amount extra for the electricity you export.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

Are solar panels renewable?

And, solar energy from panels is 100% renewable, meaning you don't need to burn carbon-emitting fossil fuels to generate energy, which is good news for the long term health of the planet. Panels are built to last. Panels are made of steel, silicon and toughened safety glass.

Why is solar energy so popular in the UK?

The popularity of solar panels is skyrocketing. More than 1.3 million rooftops in the UK are now decked out with panels - and with solar panel costs decreasing massively over the past decade, it's more accessible than ever. But why could solar energy benefit you? Well, first and foremost, it can cut your monthly electricity bills by around 70%.
