How much does solar cost per watt?

Over the last two decades, solar energy has become a lot cheaper, thanks to better panels and loads more of them being made. Solar panels cost about \$1.16 per watt. The cost per watt decreases the larger the system you buy. For a regular residential system (6.6kW) you can expect to pay \$0.98 per watt.

Will a weak Australian dollar affect solar panels?

Most solar panels are imported so if we have a weak Australian dollar, it can affect the cost of imports. Even though the dollar is currently strong, current world wide inflation levels are likely to have an effect on solar panels. That being said, it is still not really worth it to wait as the solar rebate is reduced every year.
