

How can Zeta energy's lithium-sulfur battery technology improve EV performance?

"The combination of Zeta Energy's lithium-sulfur battery technology with Stellantis' unrivaled expertise in innovation, global manufacturing and distribution can dramatically improve the performance and cost profile of electric vehicles while increasing the supply chain resiliency for batteries and EVs."

Are stellantis & Zeta EV batteries a joint development agreement?

Stellantis and Zeta Energy Announce Agreement to Develop Lithium-Sulfur EV Batteries Amsterdam and Houston, TX - December 5, 2024 - Stellantis N.V. and Zeta Energy Corp. today announced a joint development agreement aimed at advancing battery cell technology for electric vehicle applications.

What is Zeta energy battery technology?

The batteries will be produced using waste materials and methane, with significantly lower CO<sub>2</sub> emissions than any existing battery technology. Zeta Energy battery technology is intended to be manufacturable within existing gigafactory technology and would leverage a short, entirely domestic supply chain in Europe or North America.

How can Zeta energy & stellantis improve EV performance?

"The combination of Zeta Energy's lithium-sulfur battery technology with Stellantis' unrivaled expertise in innovation, global manufacturing and distribution can dramatically improve the performance and cost profile of electric vehicles while increasing the supply chain resiliency for batteries and EVs."

Does Zeta energy use cobalt?

Zeta Energy's lithium-sulfur battery technology has been rigorously tested and has shown consistently better performance than existing lithium ion batteries. Even more importantly, Zeta Energy's lithium-sulfur batteries use no cobalt, nickel, manganese or graphite.

What has happened to Zeta Energy?

Zeta Energy, a Texas-based company, announced today that it has closed its \$23 million Series A round led by Moore Strategic Ventures. The company has developed a safe, low-cost, high performance and sustainable battery for the electric vehicle and energy storage markets.

Zeta Energy Corp., the world's leading lithium-sulfur (Li-S) battery company, and Log9 Materials, a leading developer of advanced battery cell technology and EV Mobility Ecosystem products ...

Stellantis has signed an agreement with U.S.-based Zeta Energy to develop cheap lithium-sulfur batteries for electric vehicles, with an aim to use them by 2030, the two companies said on Thursday.
