We design and build high-efficiency, cost effective solar panel systems. Lower your carbon foot print, increase the value of your home or business, and SAVE MONEY! Guam and Micronesia's source for residential and commercial green energy solutions.

GUAM | Generation Renewable provides state of art technology for sustainable energy independence now and all future generations. Solar Energy, Renewable Energy, Sustainable Energy - Residential, Commercial, Local & Federal Government and Military

Our panels capture the sun's energy, channel it through discreetly placed wires to an inverter, where it's converted to electricity to power your home. When your solar power system produces more power than you need, It feeds the power back into the electricity grid.

Solar energy offers a sustainable, renewable, and abundant power source for the island of Guam. Solar power is mainstream, and with a Federal Tax Credit of 30%, the time is now to invest in a solar system that will lower your power bills, increase the value of your home, and reduce greenhouse gas emissions.
