What is Automated Storage & Retrieval System (ASRS)?

No matter what you store, Kardex's automated storage and retrieval systems (ASRS) are efficient, reliable, and reduce personnel resources and costs. Globally trained and certified service staff provide a holistic, modular solution to ensure your logistics and warehousing operations work effectively.

How do automated storage and retrieval systems work?

These automated storage and retrieval systems deliver slow- to medium-velocity items safely and quickly to an ergonomically positioned work counter at the operator's command. Manufactures add new bells and whistles with each revision, but the heart of the technology remains the same. Download the Vertical Carousel Module Quick Facts PDF

What is automated pallet warehousing?

Automated pallet warehouse: proven for medium to heavy loadsAn efficient solution for heavy and bulky goods that need to be stored quickly,safely and with optimum use of space. Automated pallet warehousing can be used more universally than any other storage technology.

How does ASRS improve logistics?

The primary goal of logistics is to ensure that goods move efficiently from one point to another. ASRS enhances logistics by optimizing storage space,increasing retrieval speed,and improving accuracy. Traditional warehouses rely heavily on human labor,which can be time-consuming and prone to errors.

What is a shuttle storage system?

Shuttles are autonomous storage vehiclesthat move independently on the cross beams of a storage rack. Shuttles can operate alone,with several vehicles on one storage level each or on several storage levels. As a result,shuttle systems are even more scalable than ASRS technology and can achieve even higher throughputs.

What are automated warehouses & how do they work?

Automated warehouses serve to optimize the storage management of thousands of pallets,making maximum use of storage space and avoiding the entry and exit of forklift trucks through the aisles of the facility,as the palletized goods are moved through the facility on satellite carts in a fully automated manner.

Esnova Racks offers the market a high density AS/RS solution that allows, among other characteristics, up to 60% more capacity in automated warehouses than other systems on the market. Its success lies in the use of a very reduced number of aisles compared to other similar storage solutions.
