

Saft has been chosen by BAE Systems to supply lithium-ion batteries for its Talisman "M" autonomous underwater vehicle (AUV). The vehicle was unveiled in 2007 and is designed to meet the growing demand from navies for ...

To advance the ES-30 battery system, Heart is partnering with BAE Systems, best known for its leading defense and aerospace solutions. The battery system will be the "first of its kind"...

The BAE OPzS Series flooded tubular plate cells are one of the most enduring lead-acid batteries on the market today. They are ideally suited for stand-by operations as well as for capacitive loads. They perfectly meet requirements ...

BAE Systems, a leading aerospace and defense company, and Heart Aerospace, a Swedish electric airplane maker, announced a collaboration to define the battery system for Heart's ES-30 regional electric airplane.

The BAE OPzS Series flooded tubular plate cells are one of the most enduring lead-acid batteries on the market today. They are ideally suited for stand-by operations as well as for capacitive loads. They perfectly meet requirements for bridging times between 1h to more than 10h. Application Uses: Power generation plants; Electrical utilities ...

The silicon nanowire battery technology contributed to the success of the Airbus Zephyr unmanned aerial system (UAS). The Airbus Defence and Space division awarded Amprius with the Innovative...

"We are delighted to collaborate with Heart Aerospace on the innovative battery system for its electric airplane." The program will leverage more than 25 years of BAE Systems' expertise in...

Swedish electric aeroplane maker Heart Aerospace has teamed up with BAE Systems to develop the battery system for its ES-30 regional electric aircraft. The battery will be incorporated into an electric conventional takeoff and landing (eCTOL) aircraft.

Saft has been chosen by BAE Systems to supply lithium-ion batteries for its Talisman "M" autonomous underwater vehicle (AUV). The vehicle was unveiled in 2007 and is designed to meet the growing demand from navies for independent vehicles that can undertake a variety of often dangerous tasks, including dealing with mines.

The system items such as PV module, batteries, and inverter size have been found as an optimum system with 220 kW, 860 BAE PVS 210 batteries, and 110 kW respectively with a lifespan of 25...
