

Dalkia combines modern technologies and creates synergy between different forms of energy and uses to develop more intelligent, connected networks called "smart grids". It is now possible to predict spikes in demand and even store renewable energy.

Ensuring the energy efficiency of all your buildings is our objective: together, let's build an action plan adapted to your needs! The energy consumption reduction targets depend on the current situation of your buildings and are set by law for some countries (in France: - 40% by 2030; - 50% by 2040; - 60% by 2050).

This integration allows us to provide comprehensive solutions that optimise buildings in complex and critical environments at any sustainability stage. With Dalkia Energy Services, you can navigate the complexities of the net-zero ...

Dalkia is an energy service company, subsidiary of the EDF Group s two main businesses consist in making the most of local renewables and unlocking energy savings. [2] Dalkia develops alternative renewables, such as biomass, geothermal, biogas and recovered energies.. The company generated EUR4 billion in revenues in 2017.

Our proposed solution focuses on making the tower's day-to-day operations and maintenance more effective, particularly for its mechanical, electrical, and plumbing systems. We're also implementing energy-efficient practices and exploring sustainable cooling solutions through cooling networks for the tower.

Dalkia has been awarded Phase 2 by ADES, expanding to more campus sites and is now in implementation phase. Simultaneously, negotiations for Phase 3 are ongoing. Complementing these efforts, Dalkia launched an Energy Awareness Campaign at the university, promoting sustainability and engaging stakeholders in energy-conscious practices.

safe, reliable, and impactful energy savings projects that make environmental and economic sense o Comprehensive industrial assessments and planning o Strategic energy management and energy savings planning o Methodical and programmatic approach for turnkey implementation o Smart lighting and controls

Dalkia Energy Solutions, EDF Group specializes in the development, construction and management of innovative clean energy solutions. We will help conduct thorough building energy assessments for your building portfolio, reviewing all aspects of your building and its energy consuming systems, with the goal of identifying the best opportunities ...
