Can battery energy storage be used to power Cambodia's grid?

"The battery energy storage system will showcase how large-scale deployment of innovative technology applications can be used to operate Cambodia's grid in the future and generate more renewable power."

How much money does ADB give to Cambodia's energy sector?

Since 1994, ADB has awarded nearly \$200 million in loans and grants to Cambodia's energy sector and provided \$6 million in technical assistance. ADB funding has focused on expanding transmission and distribution networks and support for sector reforms and institutional capacity building.

How can ADB support a green energy transition in Cambodia?

"ADB is pleased to support a green energy transition in Cambodia that will promote clean, sustainable, and inclusive economic growth through policy reform in energy planning and governance, improving grid stability, and energy efficiency," said ADB Country Director for Cambodia Jyotsana Varma.

How will ADB support Cambodia's solar sector?

The mandate builds on ADB's earlier support to Cambodia's solar sector, including through the country's first National Solar Park located in Kampong Chhnang, which will generate up to 100 MW of solar power. The program will also build on BESS projects implemented by EDC with technical and financial assistance provided by ADB.

How can ADB help Cambodia in power system planning?

"The Grid Reinforcement Project, along with ADB's ongoing assistance to Cambodia in power system planning, shows that adequate, reliable, and environmentally sustainable power supply can be provided at a reasonable cost to support equitable development," said ADB Country Director for Cambodia Sunniya Durrani-Jamal.

Does Cambodia need a solar power plan?

The mandate builds on ADB's previous support for Cambodia's solar sector, which included a 100MW National Solar Park located in Kampong Chhnang. Cambodia's Power Development Masterplan also underlines its potential to increase its solar energy generation capacity, which is expected to exceed 3GW by 2040.

The project will also pilot the first utility-scale battery energy storage system in Cambodia, which will be funded by a \$6.7 million grant. The amount includes \$4.7 million from the Strategic Climate Fund under the Scaling Up Renewable Energy Program in Low-Income Countries and \$2 million from the Clean Energy Fund under the Clean Energy ...

The Asian Development Bank (ADB) signed a transaction advisory services mandate with Cambodia's

national utility company Electricite du Cambodge (EDC) to support the development of 2 gigawatts (GW) of solar power in Cambodia.

ADB will help EDC conduct a nationwide study on opportunities for additional solar power capacity in combination with a Battery Energy Storage System (BESS), to be implemented from this year through 2030. ADB will also assist EDC in bidding out a 100-MW pilot project identified under the study to the private sector.

The project will also pilot the first utility-scale battery energy storage system in Cambodia, which will be funded by a \$6.7 million grant. The amount includes \$4.7 million from the Strategic Climate Fund under the Scaling Up Renewable ...

ADB will work with EDC to identify opportunities for additional solar power capacity paired with battery energy storage systems (BESS), which will be implemented over the next eight years.

The bank said today it will finance the construction by Electricite du Cambodge of four transmission lines and 10 substations in Phnom Penh and Kampong Chhang, Kamong Cham, and Takeo provinces. It will also support the installation of a 16-MWh energy storage facility near the ADB-backed 100-MW National Solar Park with a grant of USD 6.7 million.
