This initiative is comprised of several interrelated elements: Project Background In 2022, the Commonwealth Government provided a \$5.25 million grant to Norfolk Island Regional Council to transition the island away from diesel-fired generation.

Incite Energy "s electrical engineer, Matias Valdes and Director of Decarbonisation, Kody Ponds are working alongside Norfolk Island Regional Council to carry out commercial survey and ...

Norfolk Island is transitioning to green energy to reduce its dependence on diesel-fired generation, which is becoming more expensive and more difficult to source as countries around the world seek to decarbonize their economies.

All electrical works on Island must be completed by accredited Norfolk Island Electricity (NIE) staff or by a registered electrical contractor. Norfolk Island Electricity provides the following services to the community of Norfolk Island: ...

Norfolk Island is transitioning to renewable energy solutions, using solar and batteries to lower the cost of electricity for all residents. As part of this process, every electricity meter must be replaced. In September 2023, we will begin this process in Burnt Pine and will gradually work our way around the island. What will this mean for you...

The BESY Energy Platform operates on web-based platforms rather than a dedicated App. The cost of electricity is displayed on besy.energy/norfolk-island while your individual consumption is available by logging into the portal. I wish to pay my bill online by credit card and am unable to do this until I can set up the online account.
