

Belgium stainless steel solar storage tanks

Advanced tank features include stainless steel CoreGard(TM) anode rod, Blue Diamond™; glass lining and DynaClean(TM) automatic sediment-cleaning system, all designed to help protect the tank from the corrosive effects of water and extend the life of the water heater.

Our solar storage tanks are especially oriented to solar thermal installations. They have at least two large bare-tube heat exchangers and ensure that heat is rapidly transferred. The solar storage tanks can be easily combined with other heat generators, such as condenser boilers or a pellet heating system.

We offer new custom built stainless steel storage tanks, mixing tanks and pressure tanks from 50L to 100,000L. The tanks are configured and produced based upon your requirements. All ...
