

# Belize backup home generator

Can a backup generator be used as a primary power source?

The backup generator is designed as a backup to utility power only and should not be used as a primary power source. Answer a few questions so we can connect you with local dealers who will provide custom quotes. Equipping your home with permanent backup power requires a solution as unique as your home and the way you live in it.

Does a Generac home backup generator provide peace of mind?

Laurann M. of Los Angeles, California shares how her Generac home backup generator provides her family with peace of mind. Carlos M. shares his story on how his Generac home backup generator kept his family warm and safe during an unexpected ice storm.

How much power do you need for a home backup generator?

You will likely need at minimum a 10,000 Watt or 10kW generator to power a whole house. There are portable generators, that are cheaper than stationary home backup generators, in the 10,000 and 15,000 watt range. But likely, if you want a true home backup generator system, you will want a stationary generator in the 16,000kW and higher range.
