Bionic Power designed the Agilik--its smart orthotic device--for people with crouch gait from cerebral palsy or another knee-extension-deficiency disorder. What makes it different from the other orthotics out there is that it not only helps its users to stand taller and walk stronger, giving people more autonomy, but has the potential to increase motor control as well.

Bionic Power is looking for an intermediate embedded firmware engineer to join our Vancouver team. Bionic Power develops light-weight medical exoskeleton technology. Our first commercial device, the Agilik, is a smart, powered orthosis (or brace) that helps children and adults with gait difficulties through its innovative, powered knee joint. ...

Asia threaten Antigua and Barbuda's competitive position.⁶ Continued efforts to rethink its development strategy for the coming decades will help Antigua and Barbuda remain an active player in the international tourism market. Antigua and Barbuda is similar to many countries in an increasingly globalized and competitive world.
