

minimizan la caída de potencia causada por sombras. Son paneles cuidadosamente fabricados con fibra de vidrio templada, resina EVA, película resistente al agua y marco de aluminio, lo que aseguran 100% su uso para exteriores.

This panel features 60 polycrystalline solar cells, each with a maximum power output of between 265-285W, making it an ideal choice for those looking for a reliable and efficient solar panel. This panel is designed with a 5-busbar (5BB) configuration, which helps to increase the efficiency of the panel by reducing power loss and improving ...
