The draft HCP, prepared by Pelicans Jaw Solar, LLC, proposes to construct, operate, maintain, and decommission a 500-MW photovoltaic (PV) solar project located on 3,262 acres of privately-owned grassland. Approximately 2,975 acres of the project site would be developed with facilities to generate and store solar energy.

This proposed project involves the development, operation, and maintenance of a 500-megawatt (MW) solar facility. The Project would have the capacity to generate up to 500 MW of electricity through solar power derived from either fixed-tilt or tracker technology and up to 500 MW, or up to 4,000 megawatt-hours (MWh), of battery energy storage ...

To connect the proposed Pelicans Jaw Hybrid Solar Project to PG& E's electric system and provide new renewable energy to the grid, Pelicans Jaw Solar, LLC is proposing to construct a new approximately 8-acre switching station in Kern County (larger-project CEQA) and transfer ownership to PG& E. The switching station would be located adjacent

Pelicans Jaw Hybrid Solar Project is a 520MW solar PV power project. It is planned in California, the US. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the permitting stage. It will be developed in a single phase.
