

British Virgin Islands product solar

Is the BVI reliant on fossil fuels?

Like many island nations, the BVI is almost 100% reliant on imported fossil fuels for electricity generation, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity. Electricity Sector Data The British Virgin Islands Electricity Corporation (BVI EC) was formed by ordinance in 1978.

Does Cooper Island use solar energy?

Cooper Island generates more than 75% of its electric needs from solar PV and uses solar water heating. Virgin Limited Edition has proposed building a resort on Mosquito Island with enough renewable energy generation to make the site carbon-neutral.

How does Peter Island generate electricity?

The outer islands already use renewable resources to produce energy. Peter Island generates 70% of its electricity from two Wind Energy Solutions hybrid turbines rated at 250 kilowatts (kW) each, backed-up by diesel generators. Cooper Island generates more than 75% of its electric needs from solar PV and uses solar water heating.

ATEC BVI facilitates the transition to renewable energy in the British Virgin Islands and the wider Caribbean region. We are local leaders and pioneers in the development of the micro-grid ...

Solar Island Energy will help your British Virgin Islands business save significantly on energy bills, have reliable, self-contained utilities, improve its long-term value, and be less dependent on fossil fuels.

This profile provides a snapshot of the energy landscape of the British Virgin Islands (BVI), one of three sets of the Virgin Island territories in an archipelago making up the northern portion of the Lesser Antilles.

The British Virgin Islands is an overseas territory of the UK comprising a dozen islands in the Caribbean. Image: Mattes / Wikicommons. Construction has started on a solar plus storage project on the island of Anegada in the British Virgin Islands for a November 2023 commissioning date.

ATEC BVI facilitates the transition to renewable energy in the British Virgin Islands and the wider Caribbean region. We are local leaders and pioneers in the development of the micro-grid energy production field.

Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the classes (for comparison).

Whether you are ready to invest in a complete solar system or are shopping around for other green options, Caribbean Solar Company can help find the right product for you. Some the solutions we offer in the US & British Virgin Islands include:
