Does IKEA have a solar panel & battery storage system?

Ikea has launched a new solar panel and battery storage pack system that will enable customers to use more solar energy and save on energy bills.

How much does a solar battery cost at IKEA?

Homeowners can purchase the battery for a price of £3,000 or higher with this figure rising to £6,295 if included as part of a solar panel installation. However, Ikea also states that as much as £560 could be recouped annually by installing the Solar Storage Solution and increasing renewable energy usage to 80%.

How does IKEA's solar battery storage system work?

IKEA's solar battery storage system works in much the same way as Tesla's Powerwall, which is charged using renewable energy sources such as solar and wind. According to IKEA, homes fitted with solar panels but without battery storage only use 40 per cent of the electricity they gather from the sun.

Does IKEA sell solar panels in the UK?

Ikea has been selling solar panels in the UK since April 2016 but through this new partnership with Solarcentury they have taken another step towards making solar a more viable, affordable option for homeowners.

Is there a solar battery storage solution for UK homes?

Swedish furniture retailer, Ikea, are launching an affordable Solar Battery Storage solution for UK homes. They have announced a partnership with renewable energy company, Solarcentury, and have produced a domestic system which combines solar panels with a storage battery.

Will IKEA's solar storage system save energy?

However, the average household only uses around 40% of the energy produced by the solar panels. Ikea claim that their storage system will enable the same households to double this figure to as much as 80% with as little as 20% surplus energy being returned to the grid. This could result, they also claim, in up to a 70% reduction in energy bills.
