

Build solar power and sell it to the country

Can you sell solar energy back to the National Grid?

Householders and businesses with solar panels installed, who generate more renewable electricity than they need, can sell energy back to the National Grid under the Smart Export Guarantee (SEG). An increasing number of people are now benefiting from this government-backed initiative, and you could be one of them.

How much money can you make selling solar power back to the grid?

Consulting with a professional solar installer is recommended for a seamless setup. Homeowners in the UK can potentially earn between £80 - £165 annually by selling solar power back to the grid. The exact amount varies based on the system's size and the tariffs offered by energy suppliers.

Why do energy suppliers buy solar panels?

Energy suppliers buy them to show that the electricity they sell is renewable. Called FIT REGO Boost, Good Energy estimates that a 3kW rooftop solar array could earn around £10 a year from the scheme. Find out more about Good Energy's scheme. Which companies have Smart Export Guarantee tariffs?

How much will I be paid if I sell solar power?

The amount you'll be paid for selling solar power back to the National Grid through the Smart Export Guarantee will vary depending on the tariff you choose. It could be between 1p/kWh to 24p/kWh - the best rate available at the time of writing. Rates do change, though, so it's always worth looking at the latest tariffs.

How do I sell excess electricity generated by my solar PV system?

To sell excess electricity generated by your solar PV system, you need to apply directly to a licensed SEG tariff supplier. Your SEG licensee doesn't have to be your current top-up electricity supplier. You can choose different companies for SEG payments, electricity supply, and gas supply.

Can you sell solar energy through SEG?

No, at the moment, the only option for homeowners is to sell excess solar energy back to the grid or store it using battery storage for future use. Are there special requirements to sell energy through SEG? Yes, The SEG requires your solar panels to be under 5MW capacity and you must have an MSC certificate for installation.

Build Solar is the authorised and trusted partner of German battery manufacturer and solar integrator BOS-ag. We distribute BOS battery solutions direct to retailers and end-users within Australia and the Asia-Pacific region. ... We ...

This is made possible through a process known as smart export guarantee tariff, where surplus electricity generated by your solar panels can be sold back to the grid. This process is not just an incentive for solar panel adoption, but also a ...

Build solar power and sell it to the country
