

Does Bulgaria have a solar power plant?

In April 2023 Bulgaria's Inercom signed contract with Huasun for supply of 1.5GW solar modules. Solar power in Bulgaria has expanded by 100 megawatts (MW) in 2011. A 16.2 MW solar power plant in Zdravetz, Bulgaria was expected to be completed in June 2012, with power being sold for \$0.30/kWh in a fixed rate 20 year power purchase agreement.

How big is Bulgaria's solar power?

In a matter of months, Bulgaria's total solar power capacity is set to exceed 3 GW, compared to just 1.3 GW at the end of 2021. The lineup in the list of the largest photovoltaic plants is changing almost every week as major facilities come online, and there is more in the pipeline.

What is the future of solar in Bulgaria?

In recent years the annual growth of the solar sector has been 40% year on year, says Bulgarian Photovoltaic Association. And the future of solar is in urban projects and transport. For more information about photovoltaic projects in Bulgaria and legal advice, contact our local legal experts.

Will solar power grow in Bulgaria in 2023?

Director of Bulgarian transmission network estimated photovoltaics growth as 30% in 2022, also he expects 700 MW new solar capacity in 2023, which could represent 30-40% YoY growth. In April 2023 Bulgaria's Inercom signed contract with Huasun for supply of 1.5GW solar modules. Solar power in Bulgaria has expanded by 100 megawatts (MW) in 2011.

What is solar power & how does it work in Bulgaria?

Solar power allows for a wide range of applications - from residential, through commercial to utility scale. Government policy and legislation aim to support investors in all types of photovoltaic projects. The support schemes in Bulgaria include premium contracts and a feed-in tariff scheme.

What is the biggest solar PV plant to be built in Bulgaria?

This is also one of the biggest solar PV plants to be constructed in Bulgaria in recent years. With the solar PV plant, Aurubis Bulgaria will save some 11.700 MWh per year from grid electricity consumption (sufficient for approx. 12.000 households), which will cover an average of 2.5% of the electricity needs of its smelter facility.

In recent years the annual growth of the solar sector has been 40% year on year, says Bulgarian Photovoltaic Association. And the future of solar is in urban projects and transport. For more information about photovoltaic projects in Bulgaria and ...

The country, having experienced a solar boom in the past, was one of the first significant PV markets in

Europe. Effective subsidy schemes and the energy crisis have served as drivers for the current growth in solar capacity.

Most distributed solar PV projects currently being built in Bulgaria are being configured purely for self-consumption ; in other words, they are not connected to the grid, and are being used strictly to reduce the customer's electricity bill.

Across Europe and in countries with a natural solar advantage, such as Bulgaria, there's room for growth. Solar power is the fastest-growing renewable energy source in the EU : in 2008, it accounted for 1 %, while in ...

The Bulgarian solar energy sector is witnessing a remarkable transformation as the country's solar power capacity surges past expectations, with the biggest photovoltaic parks coming online at an unprecedented pace.

In a matter of months, Bulgaria's total solar power capacity is set to exceed 3 GW, compared to just 1.3 GW at the end of 2021. The lineup in the list of the largest photovoltaic plants is changing almost every week as major facilities come online, and there is more in ...
