

The government of Cape Verde is launching a call for expressions of interest for the construction of solar photovoltaic power plants on four islands of the archipelago. These infrastructures are being built as part of ...

A energia solar pode diminuir o custo da eletricidade e contribuir para a competitividade das empresas industriais que lutam com contas de eletricidade caras. Nossa equipe pode oferecer um design otimizado para combinar o consumo com a geração de energia solar e rentabilizar ao mesmo tempo seu sistema.

The off-grid market demand for solar panels in Cabo Verde is driven by the need for reliable electricity access in rural and isolated areas. The government and various organizations are exploring microgeneration options using solar technologies that can provide essential services such as lighting and water pumping.

A tender has now been published by the Cape Verdean government for the installation and commissioning of four new solar power farms. This project was originally presented in Praia on March 28, 2022. These will provide nearly 3.5 megawatts by June 2025.
