

A empresa Aguas de Ponta Preta inaugurou a maior planta solar fotovoltaica de Cabo Verde, com capacidade de 6 MWp, na ilha do Sal. O projeto aumentar a penetraç#231;o de ...

The ECOWAS Centre for Renewable Energy and Energy Efficiency (ECREEE) has inaugurated a renewable energy project in Ribeira Alta, Cabo Verde, enhancing sustainable electricity access in the remote region. Funded by the ECOWAS Special Intervention Fund, this initiative underscores the commitment to energy equity and development in underserved areas.

On Thursday, July 18, 2024, the United States government, through the U.S. Agency for International Development (USAID) and Power Africa, in partnership with the Government of Cabo Verde and the private sector launched a clean energy solar mini-grid plant located at Ch#227; das Caldeiras in the Santa Catarina do Fogo Municipality.

O governo cabo-verdiano abriu concurso para construir e colocar em funcionamento at#233; junho de 2025 centrais solares em quatro ilhas, totalizando quase 3,5 MegaWatts (MW), projeto cofinanciado ...

In Cabo Verde, the on-grid solar market is expanding significantly. Government initiatives include new solar parks of 3.4 MW of additional solar capacity planned for Santiago, S#227;o Vicente, S#227;o Nicolau, and Maio, reflecting Cabo Verde's commitment to enhancing its solar infrastructure and energy reliability across the archipelago. 9

State-owned Unidade de Gestao de Projetos Especiais (UGPE) published a tender on 8 March to build four solar PV plants, including a 1.3MW plant on Fogo island, a 1.2MW facility on Santo Antao island and two 0.4MW plants on the islands of Sao Nicolau and Maio, along with a storage component.

The ECOWAS Centre for Renewable Energy and Energy Efficiency (ECREEE) inaugurates a solar mini-grid project in Ch#227; das Caldeiras, Cabo Verde, providing universal electricity access to 800 residents. Funded by the Cabo Verde government, USAID, and ECREEE, the project marks a significant milestone in sustainable energy development.

a quarter of the electricity generated in Cabo Verde came from renewable energy sources and the Government's intention is to increase this to over 50% by 2030. The Government of Cabo Verde had established in its Strategic Plan for Sustainable Development (PEDS) that energy security, price stability and reduction of the energy bills
