

# Cambodia green bank battery

Can battery energy storage be used to power Cambodia's grid?

"The battery energy storage system will showcase how large-scale deployment of innovative technology applications can be used to operate Cambodia's grid in the future and generate more renewable power."

Does Cambodia need a solar power plan?

The mandate builds on ADB's previous support for Cambodia's solar sector, which included a 100MW National Solar Park located in Kampong Chhnang. Cambodia's Power Development Masterplan also underlines its potential to increase its solar energy generation capacity, which is expected to exceed 3GW by 2040.

How much money does ADB give to Cambodia's energy sector?

Since 1994, ADB has awarded nearly \$200 million in loans and grants to Cambodia's energy sector and provided \$6 million in technical assistance. ADB funding has focused on expanding transmission and distribution networks and support for sector reforms and institutional capacity building.

Why is Cambodia developing 2GW of solar capacity?

The development of 2GW of solar capacity is part of the Cambodian government's plan to meet growing energy demand by expediting the adoption of renewable energy and boosting energy efficiency. How well do you really know your competitors?

Why is ADB partnering with Cambodia?

"ADB was the nation's first development partner to fund an earlier 10 MW grid-scale solar farm and with the new National Solar Park today, ADB is with Cambodia once again in scaling up the nation's solar contribution to more than 10% of the total generation mix in capacity terms."

Does Cambodia need a new transmission infrastructure?

While Cambodia has made significant progress in expanding lower-cost power generation in the past 15 years, its existing transmission infrastructure is reaching capacity and needs to be expanded and reinforced to avoid supply interruptions.
