

# Can private individuals sell photovoltaic panels now

Can you sell solar energy back to the National Grid?

Householders and businesses with solar panels installed, who generate more renewable electricity than they need, can sell energy back to the National Grid under the Smart Export Guarantee (SEG). An increasing number of people are now benefiting from this government-backed initiative, and you could be one of them.

Are solar panels a good investment in the UK?

More than 1.3 million homes in the UK now have solar panel installations, the renewable technology making a contribution towards reducing carbon emissions and saving households hundreds each year, both through bills savings and Smart Export Guarantee payments from selling surplus electricity back to the grid.

How can a home owner make money from selling solar energy?

Earn money: Homeowners can earn money by selling back electricity to the grid in the UK through programs like the Smart Export Guarantee (SEG). Reduced carbon emissions: Selling excess solar energy back to the grid can help reduce the need for fossil fuels and decrease carbon emissions.

Are solar panels a good investment?

The sun is a potent source of clean energy, and solar panels harness some of this power to provide electricity for an increasing number of families. Selling electricity back to the grid is by no means the only benefit of solar panels. According to the Energy Saving Trust, solar panels were cutting home energy bills by up to 70% in 2023.

How do I sell excess electricity generated by my solar PV system?

To sell excess electricity generated by your solar PV system, you need to apply directly to a licensed SEG tariff supplier. Your SEG licensee doesn't have to be your current top-up electricity supplier. You can choose different companies for SEG payments, electricity supply, and gas supply.

Can you get money from solar panels?

As a homeowner with solar panels, you may be able to receive payments for any excess solar energy you send back into the grid. Since 2019, the government have backed various schemes to help those who produce renewable energy, to benefit from sending their surplus into the national energy supply.

o Only new and unused solar PV panels qualify, to ensure that the capacity is in addition to what the country already has in place. The panels can be installed as part of a new system, or as an ...
