

# Can solar photovoltaic panels be made by yourself

Can you install solar panels yourself?

As a result, you end up wondering if you can install solar panels yourself. And the answer is YES. You can DIY (do-it-yourself) install your own solar panels. All you need to do is invest your time, energy, and a little bit of elbow grease. This lowers your cost of going solar by approximately 10% or more.

Are DIY solar panels legal in the UK?

Yes. UK law is pretty relaxed about DIY solar panels, and in most cases you don't even need planning permission to install a full-sized array of solar panels by yourself. But going DIY may mean you miss out on government schemes, product warranties and utility company support, because you won't have the necessary paperwork or certification.

Can You DIY a solar panel?

Connect your DIY panel to a DC-powered device, then give yourself a high five for powering a device with the sun. In theory, maintaining a DIY solar installation should require "nothing more than your regular panel," according to Burke.

Should I buy a DIY solar panel kit?

To save cash, you may be tempted to buy a DIY solar panel kit and fit your panels by yourself. DIY solar panels are widely available and many are excellent value compared with the cost of professional installation. For example, a full 3.4kW 10-panel kit from Plug-in Solar costs £4,728.

Where can I buy DIY solar panels?

Several companies specialise in selling DIY solar panel kits to the public. Plug-in Solar is particularly easy to follow, and offers a wide range of kits and step-by-step DIY guides, plus accessories such as solar panel mounting kits. Renology, Select Solar and Sunstore Solar are also well worth a browse.
