

Why is solar power important in Chile?

Solar power in Chile is an increasingly important source of energy. Total installed photovoltaic (PV) capacity in Chile reached 8.36 GW in 2023. Solar energy provided 19.9% of national electricity generation in Chile in 2023, compared to less than 0.1% in 2013.

How much does a solar power plant cost in Chile?

Because of its good solar resource several international companies have bid record low prices for solar thermal power plants in Chile, including the Copiapó Solar Project bid at \$63/MWh by Solar Reserve in 2017. If realized this would have been the lowest ever price for a CSP project in the world.

When did SolarPack start supplying power to Chile?

In March 2020 PV Magazine reported that Solarpack had begun providing power on 2 March 2020, to the Chilean grid from its 123 MW Granja project, 10 months ahead of the contracted date of 1 January 2021. With that, Solarpack raised its total operating capacity in Chile at the time to 181 MW.

Shattered (Pty) Ltd ("Shattered") manufactures solar panels and supplies them to various customers across South Africa. The increase in load-shedding increased the demand for solar panels, and Shattered had to increase the number of hourly paid employees to ensure the demand for solar panels was met.

Solar power in Chile is an increasingly important source of energy. Total installed photovoltaic (PV) capacity in Chile reached 8.36 GW in 2023. [1] Solar energy provided 19.9% of national electricity generation in Chile in 2023, compared to less than 0.1% in 2013.
