

Community photovoltaic panels require owner consent

Do I need planning permission to install solar panels?

The installation of solar panels and equipment on residential buildings and land may be 'permitted development' with no need to apply to the local authority for planning permission. There are, however, important limits and conditions, detailed on the following pages, which must be met to benefit from these permitted development rights.

Can solar panels be built without permission?

This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission. The exceptions to this rule are typically flats, listed buildings, homes in conservation areas, and ground-mounted installations. What are the building regulations for solar panels?

Do rooftop solar installations need planning permission?

Rooftop solar installations always need building regulations approval, but rarely require planning permission. This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission.

Can solar panels be installed without a planning system?

Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system. Currently those who have to go through the planning system are having to wait over eight weeks and face extra costs.

Can solar panels be installed in a conservation area?

To increase the chances of your solar panel installation being approved in a conservation area, you can make a few upfront choices, such as: Selecting solar panel styles that blend in with your roof or building's design, such as solar tiles. Black solar panels tend to look much more appealing than blue

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.
