

In line with its firm commitment to the energy transition, ENGIE Solutions, through its subsidiary EEC, previously inaugurated a renewable energy storage and management unit in Lifou, New Caledonia in November 2019. The aim is to use solar and wind power to generate electricity, which will eventually

Connected Energy is a leading provider of next generation demand management solutions for electric utilities using two-way communications, providing full Measurement and Verification (M& V) and Predictive Analytics capabilities.

In line with its firm commitment to the energy transition, ENGIE Solutions, through its subsidiary EEC, previously inaugurated a renewable energy storage and management unit in Lifou, New ...

Since 2007, AMBI Energy SAS has designed, built and maintained photovoltaic solutions in New Caledonia and the Pacific. Our proven experience and know-how allow us to propose you efficient and reliable technologies, designed to last over time.

We are at your side to create, build and maintain solar solutions in New Caledonia and the Pacific. Our proven experience and know-how allow us to offer you high-performance and reliable technologies, designed to last over time. Your project, our commitment: AMBI Energy supports you towards safe and reliable renewable energy.

Lifou is the 5th largest city in New Caledonia, France. Remotely located and off grid, the island wanted to reduce its dependency on diesel generators and switch to both solar and wind produced energy aimed at aligning to a more sustainable and environmental-friendly approach.

The storage unit, which was connected to the high voltage distribution network in early September 2019, provides 5.4 MVA of power and has a capacity of 5.06 MWh. It can supply Lifou with ...

(ADPnews) - Nov 30, 2010 - French solar panels maker Tenesol, owned by oil group Total (EPA:FP) and electricity group EDF (EPA:EDF), has completed a 2.1 MWp ground-mounted photovoltaic (PV) installation on the New Caledonia island, southwest Pacific. The new facility, owned by Helios Bay, was connected to the grid in May 2010.

EEC Engie is successfully piloting sophisticated connected technology solutions that meet those needs and support its sustainability strategy. The distribution operator has already found that its advanced, green EcoStruxure-ready substation, which uses SF6-free MV switchgear technology combined with a connected new generation transformer ...
