

What solutions does Teknoware offer?

Both centrally supplied and self-contained solutions are available. We also supply a unique fibre optic Low Location Lighting system based on our own Optiline(TM) fibre. Teknoware also manufactures a range of central battery systems. In addition to the standard features, there is also available an automatic addressable testing system.

What is a Teknoware central battery system?

Teknoware's range of central battery systems starts with small systems containing just a few dozen luminaires and a single central battery unit up to centrally controlled systems containing thousands of luminaires.

How does Teknoware use BACnet?

Teknoware uses BACnet modules as an interface, to transfer BACnet objects from the Central Battery Systems and the luminaires. Battery and luminaire tests can also be initiated. PC software can be used to read the information of the Central Battery Systems through the BACnet bus. Also a separate COBA Software is needed for the PC.

What products does Teknoware manufacture?

Teknoware also manufactures a range of central battery systems. In addition to the standard features, there is also available an automatic addressable testing system. Teknoware's entire product range is designed to meet the requirements of the relevant European directives and standards. This is proved with certificates from accredited laboratories.

Do Teknoware luminaires need separate data cabling?

The testing of the luminaires is based on individual addresses, and the communication is by means of the power supply cables. Thus, there is no need for any separate data cabling between the luminaires. The luminaires must be addressable, of the Teknoware products with the letter K in the end, or they must have a separate address module.

How does Teknoware IC work?

Teknoware's IC (Intelligent Controller) system enables a large amount of different options, to turn the non-maintained emergency lights ON and OFF, by using voltage inputs, which can be freely chosen. At the same time, the voltage of several fuse boxes or general lighting can be monitored.

Explore Teknoware Middle East's Addressable Central Battery Systems, offering intelligent power solutions for emergency lighting. Learn about the advanced features, addressable control, monitoring capabilities, and enhanced efficiency designed for safety and compliance in various applications across the Middle East region.

The 7 series is compatible with all our 230 V addressable luminaires, which makes it easy to upgrade an old central battery system. The central battery unit is easily upgraded according to the number of luminaires in the property. Depending on the model, the 78C central battery unit has 4-24 output circuits. Max. battery capacity 65 Ah.

Teknoware offers a 230V AC/DC-based Central Battery System (CBS) consisting of control panels, aesthetically appealing emergency and exit luminaires, sub-circuit monitoring modules, address modules to connect third-party luminaires and central monitoring options.

Teknoware also manufactures a range of central battery systems. In addition to the standard features, there is also available an automatic addressable testing system. Teknoware's entire product range is designed to meet the requirements of ...
