

Czechia solar rooftop price list

How much solar power does Czechia have?

According to the International Renewable Energy Agency, Czechia had 2,073 MW of installed solar power at the end of 2020, 13 MW less than it had at the end of 2019. The nation has also provided incentives for rooftop PV through a Green Savings Program, and to solar-plus-storage projects through a separate, dedicated scheme.

Is a solar park a new start for Czech PV?

Although relatively small in size, the completion of the solar park represents a new beginning for Czech PV, as utility scale PV projects have been banned for years from the country's energy landscape and solar was also excluded by the planned auctions for large scale renewables.

Will Czech solar projects be financed through a PPA?

"There are more large scale projects under development in Czechia, that are hoping to be financed through the modernisation fund that was announced this year," Jan Krčmář, chairman of the Czech Solar Association, told pv magazine. "These projects will need to secure a PPA, as there are no auctions or other incentives for new solar power plants."

Is the PPA market a bottleneck in Czechia?

According to him, however, the PPA market is currently one of the main bottlenecks in Czechia, which the association has been warning about for years. "New large projects will receive capex subsidies, but will otherwise have to find a commercial off-taker," Krčmář explained.

It's an exciting time for energy in the Czech Republic, as the nation pours an additional CZK 55 billion (EUR 2.3 billion) into the New Green Savings program, which provides significant funding for homeowners to install rooftop solar PV systems as well as other energy-saving measures ...

In October 2022 Czechia received another funds from EU for support of rooftop PV projects and corporate projects; these 2 segment have lots of funds till end of 2025; there might be some positive changes in Nova Zelená Úsporám (New Green for ...
