

Can you repair a solar panel yourself?

It's not recommended for most homeowners to repair solar panels themselves, as they can be delicate and potentially dangerous if mishandled. It's best to hire a professional solar panel technician. Are solar panel repairs covered by warranties?

What happens after a solar panel repair?

After a repair, the optics of your system stay the same. Solar panels are all constructed in a similar way. This is a big advantage, as it makes repairs relatively easy.

Can a broken PV system be restored?

Broken modules can easily and cost-effectively be restored through a repair. When you opt for a repair, you won't change the structure or optics of your PV system. Everything will still be in original form. Repairing the panels can be the most affordable way to restore a PV system. Especially when there are no replacement modules available.

How do I choose a solar panel repair company?

Ideally, you'll choose a solar panel repair company that can help to service and repair your solar panel system for many years to come. Help get that selection right first time by checking out online reviews from previous customers. For such an important investment in your home, this simple action will provide the reassurance you need.
