How do I install a solar photovoltaic system?

Installing solar photovoltaic systems requires specialized skills and knowledge. Installation should only be performed by qualified personnel. Before installing a solar photovoltaic system, installers should familiarize themselves with its mechanical and electrical requirements.

How does a solar panel installation work?

The installer will have to lift some of the roof tiles to fix the anchors to the rafters in the loft. This will give the solar panel mounts a stable foundation, and will make sure they don't get damaged in stormy weather. Once the roof anchors have been fixed to the property, the installer will attach the solar panel mounting system to them.

How long does it take to install solar panels?

Once you decide on a solar company and system, the installation process begins. The time it takes to get your solar panels up and running depends on a handful of factors. Generally, you can expect to wait a few months before your solar panels produce energy for your home. In that time, your solar company should follow these five main steps: 1.

Can a solar panel be installed on a roof?

Yes, solar panels can be installed on a roof. With systems like Marley SolarTile™, the solar panel acts as the roof covering, reducing installation time. On retrofit projects, simply remove a section of tiles and install the solar panels in their place.

What is a roof mounted photovoltaic system guidance?

The guidance refers only to the mechanical installation of roof mounted integrated and stand-off photovoltaic systems; it provides best practice guidance on installation requirements and does not constitute fixing instructions.

Where should a solar panel be installed?

It is very important to install your solar panel at location that gets the most direct sun exposure. Solar Panels perform at optimum capacity when placed in direct sunlight. When you install your Solar Power system, try to position your photovoltaic panels directly under the noontime sun for maximum efficiency from your photovoltaic unit.
