

Does the Inter-American Development Bank support energy projects in Honduras?

Currently, the Inter-American Development Bank is contributing funds and assistance to the following projects in the energy sector in Honduras: An Energy Sector Support Loan supported through a US\$29 million credit approved in September 2008. This project will finance priority investments in transmission and support a program for reducing losses.

What type of power system does Honduras use?

With an installed generation capacity of 1,568 MW (2007), Honduras relies on a thermal-based power system (accounting for nearly two-thirds of its total installed capacity), which is very vulnerable to high and volatile international oil prices. [full citation needed] The generation mix is as follows:

What type of power plugs are used in Honduras?

In Honduras the residential power plugs and sockets are of type A and B. The standard voltage is 120 V and the standard frequency is 60 Hz. In Honduras, there is great potential in untapped indigenous renewable energy resources. Due to the likely long-term trend of high oil prices, such resources could be developed at competitive prices.

What is the largest hydroelectric project in Honduras?

The largest project, the hydroelectric plant of El Cajón (300 MW) on the Rio Comayagua in Central Honduras was commissioned in 1985. At that time Honduras had an installed capacity of 560 MW and a peak demand of only 220 MW.

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided
