

# Do photovoltaic panels need to be wiped and how to clean them

Do solar PV panels need to be cleaned?

That said, most solar pv panels in the UK will not need any heavy-duty cleaning because regular rain will wash most dirt and grime off the surface, dispelling one of the myths about solar being its difficulty to clean.

How to clean a solar panel?

Many cleaning products are too abrasive for solar panels or may leave a residue that blocks sunlight, so you should choose these carefully. Try mixing a mild detergent in water, slowly adding more cleaner if you need more cleaning power. The last step in solar panel cleaning is to dry the glass and review your work.

Should you clean your solar panels regularly?

The experts at Solar Panel Cleaning Ltd explain that if you don't regularly clean your solar panels dust can accumulate and even just one dusty cell can affect the performance of the entire panel.

Do solar panels need to be cleaned after a downpour?

Whether you have a rigid rooftop array or a series of portable solar panels, it's best to keep cleaning to a bare minimum. While rooftop panels should be fine after a downpour, call a cleaning service if in doubt. For your portable panels, keep it simple with water, and a soft cloth.

Should you clean solar panels on a rooftop?

Safety is vital when it comes to cleaning solar panels, especially if they're on rooftops or elevated locations. Some essential safety precautions to follow include: Turning Off Power: Before cleaning the solar panels, switch off the power supply to the system to prevent the risk of electric shock.

Do I need a professional solar panel cleaner?

Remember, if your solar panels are on the roof, we always recommend using the services of a professional solar panel cleaner. An expert solar panel cleaner will have the necessary training to safely shut down and restart the solar panel system before and after cleaning.
