Renewable energy leader Drax has appointed globally renowned hydro engineering consultants COWI and PINI in a new joint venture to optimise its plans to build the UK's first new pumped storage hydro plant in almost 40 years.

The Marshall Islands Program was established in 1977 by the Energy Research and Development Administration, the predecessor Agency to the Department of Energy (DOE). The program is the U.S. response to the legacy of nuclear testing that occurred in the Republic of the Marshall Islands from 1946 to 1958.

Why Drax is pushing CO2 removal as a key climate tool. Drax is out to prove that applying carbon capture and storage technologies to biomass-fired energy production is vital to get to net zero. Energy Monitor spoke to the UK power company's CEO Will Gardiner.

4 ???· British power company Drax said on Thursday it had reached an agreement on the terms of a

Drax energy Marshall Islands

multiyear supply offer of biomass pellets for Pathway Energy's proposed sustainable air travel fuel job in the United States. Under the deal, Drax will provide more than 1 million tonnes a year of sustainable biomass pellets to the plant on the U.S. Gulf Coast. The plant will produce ...
