The project aims to support the enabling environment for private sector participation in developing renewable energy in Comoros. Access to electricity remains relatively limited in Comoros, with only 8% of the population being serviced in the three islands (Grande Comore, Moheli and Anjouan).

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

Comoros: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

The report is split into two sections and uses both a written and graphical analysis - analysing the 85 largest Energy Brokers companies. The Energy Brokers (Global) report contains the most-up-to-date financial data and the publisher applies these figures to create their unique and authoritative analysis.
