

The energy sector is particularly important to the Lithuanian economy, and energy security is a strategic priority for the government. The government is developing plans for Lithuania to generate 80% of its domestic energy needs by ...

Gas Interconnection Poland-Lithuania (GIPL), also known as the Lithuania-Poland pipeline, a natural gas pipeline interconnection between Lithuania and Poland was completed and became operational on 1 May 2022. The capacity is 1.9 billion cubic metres per year.

Polish President Duda and the Baltic states' presidents participated in the ceremony in Klaipeda, Lithuania, to officially transfer ownership of the floating gas terminal Independence to Lithuania. This terminal is vital for the country's energy security.

The terminal represents Lithuania's frontline in the ongoing pursuit of energy independence, and we take immense pride in the fact that the Lithuanian flag will now proudly fly over it." FSRU Independence. Under Höegh Evi's management, the Independence has supplied nearly 16 billion cubic meters of natural gas to Lithuania and surrounding ...

is identified in one of the following intervention fields (i.e. 029 - Renewable energy: solar; 032 - Other renewable energy (including geothermal energy); 033 - Smart Energy Systems (including smart grids and ICT systems) and related storage.) this amount was deducted from the respective categories (i.e. renewables and grids).

The National Energy Independence Strategy is designed to bring about fundamental changes in the energy sector. One of the main ones is the replacement of fossil fuels by climate-neutral energy sources, which will change the whole energy chain from production to transmission and consumption.

Polish President Duda and the Baltic states' presidents participated in the ceremony in Klaipeda, Lithuania, to officially transfer ownership of the floating gas terminal ...

The terminal is crucial for Lithuania's energy security, experts say. During the first nine months of 2021, Independence has been the main source of natural gas imports to Lithuania - more than 65 percent of gas ...

The terminal is crucial for Lithuania's energy security, experts say. During the first nine months of 2021, Independence has been the main source of natural gas imports to Lithuania - more than 65 percent of gas reached the country through the LNG terminal.

According to the National Energy Independence Strategy, there are three main sectors, where the development

Energy dock Lithuania

of RES is planned and accounted for in the National statistics of Lithuania: the electricity sector, the district heating/cooling sector, and the transport sector.
