

The objective of the S& L program is to help consumers make an informed choice about various energy-consuming appliances, in terms of energy savings, that would result based on each appliance's energy efficiency performance. This scheme also helps the consumer determine the cost-saving potential of the marketed household and other equipment.

The ministers welcomed progress made under the partnership to drive clean energy innovation, strengthen energy security, and accelerate clean energy transitions, including through more focused efforts on clean energy manufacturing and building resilient, responsible, stable, secure and diversified supply chains.

The objective of the S& L program is to help consumers make an informed choice about various energy-consuming appliances, in terms of energy savings, that would result based on each ...

3 ???&#0183; The energy efficiency labeling programs under BEE are intended to reduce the energy consumption of appliance without diminishing the services it provides to consumers. To ...
