

To meet these objectives, GoT has identified renewable energy sources (RE) as a key priority, alongside the rehabilitation of existing hydropower plants and investment in energy efficiency. Solar PV appears to be part of the least-cost options.

Tajikistan's geographic proximity to some of the world's fastest-growing energy markets means that investing in developing its hydropower potential can contribute to regional energy security and the clean energy transition, in addition to addressing Tajikistan's high vulnerability to climate change and natural disasters.

Energy Solutions is a young and dynamic advisory agency dedicated to engineering and consultancy. We are highly specialized in the technology of high voltage and electrical power.

Although the National Development Strategy 2030 makes of hydroelectric development, energy sources diversification and energy efficiency some of its core objectives, the country increasingly turns to the 4.2 billion tonnes of coal buried in its soil to satisfy its energy needs.

Geres worked on identifying as many as possible solutions that were implemented in Tajikistan and further documented them in this report. As a result, 21 energy-efficient, renewable energy and housing improvement
