

Energy storage system announcement

How will the new energy storage scheme work?

The new energy storage scheme will include a cap on the revenues of project owners, forcing them to share some or all profits above a set threshold, while a minimum floor price will guarantee certain revenues for operators.

How much government funding has been given to energy storage projects?

This was published under the 2022 to 2024 Sunak Conservative government. Over £32 million government funding has been awarded to UK projects developing cutting-edge innovative energy storage technologies that can help increase the resilience of the UK's electricity grid while also maximising value for money.

What is the long duration energy storage Investment Support Scheme?

Long Duration Electricity Storage investment support schemes will boost investor confidence and unlock billions in funding for vital projects. The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure.

Can new energy storage technologies boost UK energy resilience?

However, new energy storage technologies can store excess energy to be used at a later point, so the energy can be used rather than wasted - meaning we can rely even more on renewable generation rather than fossil fuels, helping boost the UK's long-term energy resilience.

Could a new energy investment spur the first long-duration power storage facility?

The Department for Energy Security and Net Zero (DESNZ) said the new investment scheme could spur the first major long-duration power storage facilities the country has seen in almost four decades.

Can long duration electricity storage help decarbonise our energy system?

We're consulting on the policy framework to enable investment in long duration electricity storage. Long duration electricity storage can provide an important contribution to decarbonising our energy system. For example, it can store renewable power and discharge it during periods of low wind.

Highview Power, a global leader in long-duration energy storage solutions, today announced plans to construct the UK's first commercial cryogenic energy storage facility (also referred to as liquid air) at large scale, ...

Energy storage is key to secure constant renewable energy supply to power systems - even when the sun does not shine, and the wind does not blow. Energy storage provides a solution to achieve flexibility, enhance ...
