

Envision Energy Wind Power Generation Interview

What makes envision a good wind turbine company?

Meanwhile,Envision has the most experienced and excellent offshore R&D and engineering teams. It established the R&D Center in USA,Denmark and Germany. Envision's 2MW platform wind turbines are designed to maximize performance,increase energy yield,and minimize downtime for a lifetime of reliable energy production.

How long has envision been a leader of offshore wind turbines?

As the leader of the offshore wind turbines in China,it has been more than 5 yearssince Envision s self-developed 4MW wind turbines are produced and operated. Envision has the world's leading integrated design,engineering construction and operation and maintenance capabilities of offshore wind farms.

What is envision's world first SMart wind turbine for low wind speed sites?

Envision' s world first smart wind turbine for low wind speed sites has accelerated the strategic realignment of China's wind power industry by effectively tapping low wind speed areas, which accounts for more than 60% of China's wind resource. So far, Envision has the largest market share in low wind speed turbines in China.

Why should you choose envision for offshore wind turbines in India?

As a leading provider of offshore wind turbines in China,Envision has successfully produced and operated its self-developed multi MW wind turbines for last one decade. We can leverage our proven design,engineering construction,and operation and maintenance capabilities to support the development of offshore wind farms in India.

Who is Envision Energy?

Envision Energy is the first in the industry to develop "smart turbine"with its exclusive core technology of smart control,advanced measurement method,expert data analysis system,active performance control and reliability-based deterministic turbines.

Who is envision?

Envision is a pioneering company that offers a comprehensive and integrated solution for clean energy,encompassing generation,storage,and software. Our expertise lies in the development of advanced wind turbines,energy storage systems,and software solutions capable of managing energy assets on a global scale.
