Why should you Lease Your Land for solar & battery storage?

We want to partner with farmers and landowners across England for our solar and battery storage investments. Leasing your land for utility-scale energy assets can help you to earn long-term, stable income- while playing a role in the UK's journey to net zero.

Should you lease land for energy storage?

These can charge from the grid when there's an abundance of renewable electricity during peak generation periods and then discharge back onto the grid when there's a shortfall in supply. By leasing land for an energy storage asset, landowners can secure a long-term, stable income.

Where should a battery storage lease be located?

In an ideal scenario, the grid connection would be located on the land in question as they are considered more favourable in planning, while also reducing the cost of an extended cable run. Properties that qualify for battery storage leasing are ideally located adjacent to a substation.

What is a battery storage plant?

In short, battery storage plants, or battery energy storage systems (BESS), are a way to stockpile energy from renewable sources and release it when needed. When the wind blows and the sun shines turbines and solar panels may generate more energy than needed on a particular day.

Should you Lease Your Land for utility-scale energy assets?

Leasing your land for utility-scale energy assets can help you to earn long-term, stable income- while playing a role in the UK's journey to net zero. If you're not sure where to start, there are six factors to consider when checking land suitability:

Could huge battery storage plants become a common sight in the UK?

Huge battery storage plants could soon become a familiar sight across the UK, with hundreds of applications currently lodged with councils. In one corner of West Yorkshire locals are fighting plans to site two facilities within a mile of their homes.

Property considerations for standalone battery projects A patchwork of rights. Standalone battery storage developments typically involve a lease of the installation site with ancillary rights over the landowner's retained land (the "Lease"). The Lease would usually be granted pursuant to an option agreement or conditional agreement for lease.

For a solar or battery storage development, your land should not usually be within a national park, nature reserve, area of outstanding natural beauty (AONB) or site of special specific interest ...

# Fiji leasing land for battery storage uk

We want to partner with farmers and landowners across England for our solar and battery storage investments. Leasing your land for utility-scale energy assets can help you to earn long-term...

For a solar or battery storage development, your land should not usually be within a national park, nature reserve, area of outstanding natural beauty (AONB) or site of special scientific interest (SSSI) - though there may be exceptions in some cases.

Our development team is always looking for land that we believe to be optimal for battery storage and when we find it, we pay well. Our batteries come pre-assembled and are installed on level concrete pads, this makes projects easy to set up and quick to decommission. ...
