Our cutting-edge solar-powered water systems are designed to maximize your irrigation efficiency, ensuring that your crops thrive while you save on energy costs. Ready to take your farming to the next level?

Tulima Solar provides access to affordable and modern farm equipment by offering farmers financing to acquire solar-powered water pumps for irrigation. Their approach focuses on mutually beneficial partnerships, consumer finance, and after-sales service:

A basic introduction to solar water pumping systems . A solar pumping system involves using solar energy to pump water from a source on the surface (lakes, rivers, streams, reservoirs) or from inside a well, to your fields to irrigate your crops. Solar water pumps are widely to supply well water and upstream sources to livestock/crops.

Tulima Solar offers a variety of solar water pumps that provide water for crop irrigation, animal husbandry, domestic use, horticulture, and others. Our solar water pumps are categorized into two including submersible and surface pumps.
