

Generator rear wind shield

Can a storm shield cover run a generator?

Enjoy a neat, finished look while running your generator with confidence - the Storm Shield cover has the ability to withstands up to 70 mph winds, up to 12 inches of rain per hour and up to 18 inches of snow per day. The durable RF-welded seams and tough, NFPA-701 flame retardant rated vinyl fabric ensure the cover remains waterproof.

How to protect a generator from wind?

Put all the skirts down to protect the generator when not in use. The thick fabric and built-in filler prevents cover from billowing in the wind. IGAN generator tents have proven to adapt to thousands of 3500w-12000w portable generators on the market. It is suitable for square and tubular frames.

Do Hampshire generators have a generator cover?

Hampshire Generators have a full range of generator covers, built for standard, closed generators and open generators. Covers can be placed over the petrol or diesel generator to protect from rain during use or to protect whilst away. We stock covers suitable for the most popular generator brands and sizes.

What is a weatherproof generator cover?

These weatherproof generator covers are designed to keep your generator dry while running in the rain. Comes with a roll up zipped front panel and a roll up zipped side panel for the exhaust. The cover slips over a strong sturdy frame and has fixing loops on each corner for pegging down. These covers also help reduce the noise output.

How to protect a generator from rain?

It can effectively protect the generator from rain, snow, high winds and sun. The skirts of the cover are suspended from the metal buckles on the top while running (except for the side with the electrical panel). It will not block the intake, vent, and exhaust area of your generator. Frame it, Hang it, then Cover it.
